Dear Ms eHong Tan,

RE: SteamPro Energy Conservation System

We, Hycare International Co Ltd installed both SteamPro Condensate Removal and Recovery System in December 2005.

Since the completion of the installation, we are very happy with the performance of the system.

It has enabled Hycare to run 8 production lines with one boiler instead of two before SteamPro being installed.

Most importantly, SteamPro System has helped us consistently save our fuel cost approximately 15%, and our reject rate has reduced through its provision of consistent and regular temperature.

We have also saved on our maintenance and labour cost since very minimal maintenance is required.

We have no doubt SteamPro System is of high quality and it works!

Yours sincerely,
HYCARE INTERNATIONAL CO LTD.
